OBJECTIVE

Computer Science undergraduate with strong foundations in Python, Java, SQL, and data-driven problem solving, seeking an entry-level analytics role to work on real-world business and data challenges.

SKILLS

Technical Skills:

- Programming & Analytics: Python (data handling, problem-solving, basic scripting), Java (Core Java, OOP, Collections Framework)
- Databases: MySQL, SQL, JDBC
- Web Technologies: HTML5, CSS3, JavaScript, React
- Tools & Platforms: Git, GitHub, VS Code

Behavioral Skills: Leadership, Team collaboration, Communication skills, Active listening, Problem-solving, Time management, Adaptability

EDUCATION

Mauli College of Engineering and Technology, Shegaon **2023 – 2026**
Bachelor of Engineering in Computer Science (CGPA: 8.46)

Government Polytechnic, Khamgaon **2020 – 2023**
Diploma in Computer Engineering (Percentage: 83.94%)

Rana Lucky Sananda Educational Shower, Khamgaon **2020**
Secondary School Certificate (Percentage: 92.60%)

INTERNSHIPS

Python Intern | YBI Foundation **2024**

- Applied Python for problem-solving, data handling, and logical programming.
- Built mini projects focusing on conditions, loops, functions, and file handling.
- Strengthened analytical thinking and debugging skills through hands-on tasks.

Web UI Developer Intern | Microspectra Software Technologies Pvt. Ltd. **2022**

- Developed responsive web UI using HTML, CSS, and JavaScript for a restaurant-based application.
- Collaborated with team members to translate functional requirements into UI components.

PROJECTS

Student Attendance System Using Face Recognition (Group Project)

- Built attendance system with 92%+ accuracy using Haar Cascade LBPH for robust face recognition.
- Automated real-time attendance in Excel, minimizing manual effort and errors with an intuitive GUI.
- Developed end-to-end workflow for face training, recognition, and thresholding to ensure system reliability.

Raksha App — Women Safety Android Application (Individual Project)

- Developed an Android app that sends SOS SMS with real-time location to a predefined contact.
- Implemented shake detection using accelerometer and SMS functionality via SmsManager API.
- Integrated SQLite to store emergency contacts and enable offline functionality also added siren alert.

CERTIFICATIONS

NPTEL - Data Base Management System : (Link)

Udemy - Java Programming : A Comprehensive Bootcamp from Zero to Hero : (Link)

ACHIEVEMENTS

- President, ISTE Student Chapter (2025 - 2026)
- Winner, Paper Presentation - Government Polytechnic, Gondia
- State-level Yoga Champion
